Characteristics of Programs of Information Literacy that Illustrate Best Practice

Information Literacy in the Washington Community and Technical Colleges - LSTA Grant

The ACRL Best Practices Survey was previously conducted in summer 2006. At that time, you were asked to measure where your institution was in terms of incorporating information literacy practices when the grant was first awarded and at the midway point. We are administering the survey one final time now. Ideally, the results of the surveys will show an arc of progress in achieving Best Practices at your institution. However, we strongly encourage you to answer each survey question honestly, even if you do not feel this reflects positively on the achievement of Information Literacy goals. Answer each question in the context of your library's practices today.

Go the IL Wiki to see the answers you submitted previously.....

This is being used as a self-evaluation of our progress throughout this grant process. This does not assume all colleges are doing all of these things at the "Program Strength" level or that all of these activities are equally important to us.

Please complete by May 9th, 2008.

Optional Questions

program so rai:
Collaboration with discipline faculty in quarter long participation in courses has highlighted IL efforts.

What activities at your library (or college) have really advanced your information literacy

What challenges or barriers do you still feel you face in implementing the Information Literacy Program you want to have?

Faculty feel overburdended by present duties, and see the Core abilities and assessment rubrics as additional burden

Do you feel the grant (and its activities) have been helpful or supportive in accomplishing your goals? What else could be done?

Kept us on track, and came at a time when "Core Abilities" was becoming very important at the college. I'd like more IL marketing information.

Thank you for completing your self-assessment!
